# 1. INTRODUCTION

## 1.1 THE NATURE OF ABUSE

Schapelle Corby's legal and human rights were seriously abused during the Bali trial, of 2004/2005. This is documented in the *Expendable* report: '*Breaches of the Indonesian Code of Criminal Procedure, and the UN International Covenant on Civil and Political Rights, in the Schapelle Corby Trial*'.

Unfortunately, this was merely a prelude to the regular and repeated breaches which were to follow in prison.

Whilst those behind closed doors are outside the scope of the *Expendable* mission, those open and in public are not, as they relate to the complicity and disregard of the Australian government. The most obvious of these involve the Australian media.

The conditions which Schapelle Corby has endured are terrible enough, with lurid descriptions of squalor, overcrowding, and overbearing heat, common on a number of websites, and in books such as *Hotel Kerobokan*.

However, Schapelle Corby endures significantly more than this. She has suffered a sustained series of individual abuses at the hands of the local and prison authorities, and the Australian media.

As a high profile '*celebrity*' prisoner, she has been systematically exploited for prison public relations purposes, she has been subjected to individual persecution, often for political reasons, she has been harassed and exposed regularly, and she has been intimidated with threats and worse.

These are not unsubstantiated allegations; they are abuses which are both documented, and open.

But there has been no intervention from the Australian government, no involvement by the United Nations, and no protest from groups which refer to themselves as humanitarian in nature.

Even in full view of an uncaring world, Schapelle Corby has been fair game for open exploitation, and abuse, on a staggering scale.

This situation remains unaltered to the present day.

## 1.2 HUMAN RIGHTS / GENEVA CONVENTION

In a formal war scenario, prisoners have a degree of protection under the Geneva Convention. This is described thus:

*[Article 27 says that people protected by the Fourth Convention 'are entitled, in all circumstances, to respect for their persons' and are to be protected from violence, threats, insults and public curiosity. A similar provision under the Third Convention protects prisoners of war against "insults and public curiosity"]*

And,

*["Art. 27. Protected persons are entitled, in all circumstances, to respect for their persons, their honour, their family rights, their religious convictions and practices, and their manners and customs. They shall at all times be humanely treated, and shall be protected especially against all acts of violence or threats thereof and against insults and public curiosity".]*

Of course this is not a formal war situation, but quite clearly, Schapelle Corby has been exploited and abused in many ways which would fall foul of this, for example, by her regular display for 'public curiosity' via the Australian media.

Another sanctioned intrusion: A mentally ill Schapelle Corby, on media display, desperately seeking cover

This abuse has also been compounded by her deteriorating and severe mental illness, to which it has no doubt contributed. Although humanitarian provisions for the mentally ill exist under a number of conventions, they too have been overlooked.

### 1.3 THE TIMELINE

Some months ago a humanitarian team began to document the timeline of some of these open abuses. Given the sheer number, this was a significant task, and it is far from complete. However, the interim report has recently been published, and permission has been provided to the *Hidden World Research Group* for inclusion in this report.

It should also be noted that from 2008, Schapelle Corby's loss of mental health impaired her ability to defend herself. In prison conditions, this is a grave matter. The media intrusions, for example, became even more disturbing, particularly with respect to her increased paranoia regarding cameras and observation (eg: refer to the Channel 9 intrusion incident of April 2010).

2010: A visibly distressed Schapelle Corby, shouting that she is being beaten by her guards, is roughly manhandled and dragged away, having just begged the governor for protection from the media.

The extracted log is provided below, with relevant media articles provided in a separate PDF.

It is extremely disturbing, but equally disturbing is that this is only the open view.

It should be stressed that no nation, or organization, has even lodged a complaint, let alone taken any action to assist the victim.

16th to 25th	<p>A magazine publishes an interview with former inmate Tjin "Eddy" Yu about his relationship with Schapelle. The article is titled '<i>Schapelle's Secret Prison Lover</i>'. In follow-up reports by other news sources, Schapelle's mother is forced to deny that Eddy and Schapelle were lovers. According to the interview with Eddy, Schapelle was given a pregnancy test by the prison's medical staff. Eddy neither confirms nor denies whether he had sexual relations with her; and said that he did not feel guilty about the scrutiny she went through when the media found out about the tests. Eddy was moved to another prison in a remote part of Madura Island some time before the interview was published. But then he states: "<i>Corby didn't get a remission because she kept and used a hand phone in her cell.</i>" This constitutes two distinct levels of punishment.</p> <p>The prison makes a public show of enforcing rules, though in reality it is only with respect to Schapelle that such rules are rigorously enforced. 9th to 13th	<p><u>Exploitation for Prison PR, Media Intrusion</u></p> <p>It is reported that Schapelle and other inmates have made a proposal to set up a beauty salon inside the prison to train inmates and open a shop at the jail entrance to sell handicrafts to the public. The Australian press use this opportunity to further ridicule: <i>“Schapelle Corby’s new job ... a lengthy jail perm”</i> and <i>“Beauty school for jailbirds”</i> and similar.</p> <p>Many inaccuracies and falsehoods are again published. For example, Schapelle is incorrectly described as a senior prisoner in charge of a group of women, a role which has never been granted to her.</p> <p>Kerobokan’s chief warden allows a freelance journalist into the prison specifically to film an interview with Schapelle Corby about the beauty parlour proposal. Schapelle's psychiatrist, Dr. Denny Thong describes her condition as serious but her prison doctor, Agus Hartawan, is unable to give a comment based on his own observations.</p> <p>He quotes Schapelle's cellmates: <i>"According to her cellmates she doesn't sleep at night. Sometimes she is blank. Sometimes she just hangs around the cell, sometimes she forgets about things. Sometimes she forgets to look after herself, has bad dreams."</i> He suggests Schapelle may be responsible for her condition because she does not appear to be taking her medication. 	<p>He describes Schapelle's previous breakdown (2008) using terms like "<i>fellow inmates were aware of the ruse</i>", and even refers to her eating out in restaurants.</p> <p>It features a photograph of "<i>Schapelle Corby's comfortable cell which she shares with one other inmate.</i>" The truth is that it is not her cell at all, and her number of her cellmates fluctuates continuously from five to a dozen or more. Note also Shadrake's other contributions.</p>		
3rd to 4th	<p><u>Media Harassment, Breach of Confidentiality</u></p> <p>Late in the evening prison officials enter Schapelle's hospital room and tell her she will be returned to the prison immediately. No prior notice was given to Schapelle, but the media were certainly notified because they are present and waiting when Schapelle emerges from her room. The scene is described as '<i>angry and chaotic</i>' but there is no evidence of that in the footage broadcast nation-wide on Australian TV.</p> <p>There is, however, evidence that Schapelle's mother Rosleigh is herself on the verge of a nervous collapse during an altercation filmed with a hidden camera inside the hospital. The video receives nation-wide coverage in Australia.</p> <p>On the first day of Schapelle's return to prison a Dr. Nyoman Ratep, frequently and incorrectly described as her doctor, says her condition improved during her stay in hospital but she is still sick. In 2007 prison authorities explained that Schapelle would be denied any remissions that year because she <i>broke the rules</i>. Now it is announced that she will receive a <i>reduced</i> sentence remission due to that same incident.</p> <p>One report quotes a jail official who says Schapelle '<i>behaved well in prison</i>' but received a lesser reduction for allegedly keeping a mobile phone in her jail cell. Several reports make the same claims, creating the false impression that it is a recent and new offence.</p> <p>In other reports, the same jail official confirms that Ms Corby followed the rules and was not defiant towards prison staff. An Australian journalist, Tom Allard, states: '<i>Corby has missed out on remissions due to her poor behaviour in Kerobokan that has included bringing a mobile phone into the prison.</i>' The story receives nation-wide coverage in Australia.</p> <p>On the same day, two women's magazines publish articles, one containing prison PR and the other a report on Ms Corby's mental condition (see 24th August below).</p>	<p>Corby and Lawrence in line for sentence cuts</p> <p>Corby in line for sentence cut</p> <p>Corby, Lawrence given sentence cuts</p> <p>Drug traffickers Schapelle Corby and Renae Lawrence have jail sentences cut</p> <p>Schapelle Corby, Renae Lawrence get sentence cuts in Indonesia</p> <p>Sentence cut for Oz drug runners jailed in Bali</p> <p>Sentence cuts for Lawrence, Corby</p> <p>Schapelle Corby turns her back on jail party</p>	<p>News Corp.</p> <p>Nine Network</p> <p>Australian Broadcasting Corporation</p> <p>The Standard (HK)</p> <p>Fairfax Media</p>

<p>17th to 31st</p>	<p><u>Exploitation for Prison PR</u></p> <p><i>Woman's Day</i> (on sale 17<sup>th</sup> August) publishes an article by Alan Shadrake about Renae Lawrence, another inmate of Kerobokan. It features a photograph taken without Schapelle's knowledge of Lawrence apparently '<i>caring for her</i>'.</p> <p>Lawrence claims the prison appointed her to care for Schapelle, and that she has been secretly caring for her for a year. She claims Schapelle's family welcomes her help, but she does not reveal that her role involves administering anti-depressant drugs prescribed by Schapelle's doctor.</p> <p>Lawrence's '<i>carer</i>' role was actually short-lived because the drugs were not always administered. Those facts are not revealed in Shadrake's article.</p> <p>A few days after the publication of the <i>Woman's Day</i> article, <i>New Idea</i> magazine publishes an extensive feature in which a leading Australian psychiatrist, Associate Professor Dr Jonathan Phillips, discusses Schapelle's deteriorating mental condition.</p> <p>Dr Phillips' expertise and ethics are beyond reproach, and he has a long and extremely distinguished career, but within a few days his diagnosis is disputed by the '<i>prison doctor</i>', Agus Hartawan. Incredibly, the Australian media support the prison doctor's attack by implying the report's truthfulness is questionable, because the doctor received a fee (which is not true) or they simply accuse Schapelle of faking her illness.</p> <p>Other Australian commentators suggest that Schapelle is unworthy of any humanitarian consideration.</p>	<p>Schapelle would be dead without me (<i>Woman's Day</i>);</p> <p>Bring Schapelle Home - Or She'll Die (<i>New Idea</i>) pp. 14-18; Schapelle Corby 'hanging by a thread'; Corby will die if not moved: family (1) &amp; (2); Glossy Mag Insanity; What makes Schapelle Corby so special? - Hinch interviews Downer (Radio 3AW) (audio); New Fears For Schapelle Corby; Schapelle Corby 'clinically insane'; Schapelle Corby clinically insane, says psychiatrist; Schapelle Corby diagnosed as clinically insane (video); Schapelle Corby is 'clinically insane' - psychiatrist (video); Schapelle is insane, Australian doctor claims, Corby family want her back in Australia; Corby 'hanging on by a thread'; Psychiatrist: Schapelle Corby 'insane'; Corby has gone insane, psychiatrist says; Corby is insane, says top shrink; Corby should be jailed in Oz: Bligh; Premier backs calls to bring Schapelle Corby back to Australia; Corby won't survive Bali jail, psychiatrist warns; Dr. Louise Newman interviewed re Schapelle Corby (Radio 6PR) (audio); Neil Mitchell interviews Professor Phillips (Radio 3AW) (audio); Simon Beaumont interviews Tony Wilson (Radio 6PR) (audio); Schapelle Corby 'insane', could die; Lockerbie release hurt Corby; Bali doctor hits back over Corby diagnosis; Corby is fine, says Bali prison doctor (1) &amp; (2); New Corby diagnosis; Roy</p>	<p>Woman's Day</p> <p>New Idea</p> <p>Fairfax Media</p> <p>Seven Network</p> <p>News Corp.</p> <p>APN News &amp; Media</p> <p>Fairfax Radio 6PR (Perth)</p> <p>Fairfax Radio 3AW (Melbourne)</p> <p>Nine Network</p> <p>CNN</p>

24th	<u>Media Intrusion</u> Channel Nine show intrusive footage of Schapelle Corby in a state of distress, as she is pursued and violated by a photographer within the prison.  Reports of the scene are repeated throughout the Australian media.	Corby lashes out at photographer	Nine Network

Note that in September 2011 reports emerged that Schapelle Corby had attempted suicide via an overdose of her own psychotic medication. She was refused access to hospital treatment, despite having consumed over a week's supply of the drugs.

Again, the Australian government did not intervene.
